REPLICATION COMPONENT INCORRECT VERSION DISPLAYED

1. GENERAL

After installing the LOGFAS Replication Component from the LOGFAS 6.5.0 media, the file version reports 6.4.0.31641.

2. SYMPTOMS

1. Navigate to the LOGFAS Replication Component installation directory. (e.g. C:\Program Files (x86)\NATO\LOGFAS6\Replication\).
2. Right-Click on the LogfasReplicationService.exe[1] file and select "Properties".
3. Click on the "Details" tab.
4. The "File version" property shows version: **6.4.0.31641**.

---

[1] Other DLLs in the Replication Component directory may show the same version details.

3. CAUSE

Metadata referring to release version was not updated from version 6.4.0 prior to the software compilation and build.

4. RESOLUTION / WORKAROUND

Ensure that the correct build number for LOGFAS **6.5.0** Replication is in fact 6.4.0.**31641**. This build number is only relevant to LOGFAS **6.5.0**. Any lesser build number (e.g. 6.4.0.28346) will apply to earlier LOGFAS releases.

No further action is required.
