'NOTHING IS FREE IN THIS UNIVERSE'

Accuracy

● Speed of Light

"तथा च स्मर्यते योजनानां सहस्रं द्वे द्वे शते द्वे च योजने एकेन
निमिषार्धे- न क्रममाण नमोऽस्तुते- ॥" (ऋग्वेद 1.50.04)

In Rigveda, a statement given by Maharshi Sayanacharya says,

[O Sun] You traverse **2,202 yojanas** in **half a nimesha**.

Yojana is about **9 miles** as in the Arthashastra (and Mahabharat Adiparva).
The measures of time defined in the Puranas:

1 Day-Night = 30 Muhurta = 24 hours
1 Muhurta = 30 Kala = 24/30 hours
1 Kala = 30 Kastha = 24/900 hours = 1.6 minutes
1 Kastha = 15 Nimesha = (1.6/15) min = 3.2 seconds
1 Nimesha = 3.2/15 = 0.21333... second

A Nimesha is therefore equal to **0.21333 second**

If you calculate, the value is

(2202 x 9 miles)/(0.21333/2 sec) = 185793.75 miles/sec

The **current value** of the speed
of light is **186282.397 miles per second**

● Distance between Sun and Earth

जुग सहस्र जोजन पर भानु ।

लील्यो ताहि मधुर फल जानू ॥ -Hanuman Chalisa

1 Juga = 12000 years
1 Sahastra = 1000
1 Yojan = 9 miles
1 Mile = 1.6 km

Juga x Sahastra x Yojan = per Bhanu
12000 x 1000 x 9 = 108,000,000 miles
108,000,000 miles x 1.6 km = **172,800,000 km to Sun**

According to **NASA**, distance between Sun
and Earth is **149,600,000 km** which is
approximately equal to Rishis calculations.

'THE FOOTPRINT OF YOUR EVERY ACT IS IRREVERSIBLE'

● Light of Moon

अत्राह गारमन्वत नाम त्वष्टुर पीच्यम ।
इत्था चन्दमसा गृह ॥ (ऋग्वेद 1.84.15)

The moving Moon always receives a ray of light from Sun.

● Eclipses

यत्वा सूर्य स्वभानु स्तमसाविध्यदासुरः ।
आत्रविद्यथा मुग्धा भुवनान्यदीधयुः ॥ (ऋग्वेद 5.40.5)

O' Sun! When you are blocked by the one whom you gifted your own light (Moon), then earth gets scared by sudden darkness.

When rest of the world was scared thinking Eclipses were caused by some sort of black magic, Rishis explained the science behind it.

● Gravitational force

हिरण्यपाणिः सविता विचर्षणिरुभे द्यावापृथिवी अन्तरीयते ।
अपामीवां बाधते वेति सूर्यमभि कृष्णेन रजसा द्यामृणोति ॥ (ऋग्वेद 1.35.9)

The Sun moves in its own orbit but holds the Earth and other heavenly bodies in such a manner that they do not collide with each other through the force of attraction.

● Centripetal force between Sun and other planets

सविता यंत्रः पृथिवीमरम्णादस्कम्भन सविता द्यामदंहत ।
अश्वमिवाधुद्नुनिमन्तरिमतूत बद्धं सविता समुदम ॥ (ऋग्वेद 10.149.1)

Sun has tied the Earth and other planets through its attraction and moves them around itself as if a trainer moves newly trained horses holding their reins.

● Telegraphy in Vedas

आवां रथं पुरुमायं मनाजुवं जीराश्वं यज्ञियं जीवस हुव ।
सहस्त्रकतुं वमिनं शतद्वसुं श्रुष्टीवानं वरिवा धामभि पयः ॥ (ऋग्वेद 1.119.10)

With the help of bipolar forces (Aswins), you should employ telegraphic apparatus made of good conductor of electricity.

It is necessary for efficient military operations but should be used with caution.

Surprisingly today's modern science theories, concepts and values are equivalent to the inventions already mentioned in Vedas, written thousands of years ago.

For eg, Value of Pi, Shape of Earth, Circumference of Earth, Estimated Length of Year and the list is long..

'MEDITATION IS NOT FOR SLEEPING, ITS FOR AWAKENING'

Mathematics

● Maharshi Baudhayana

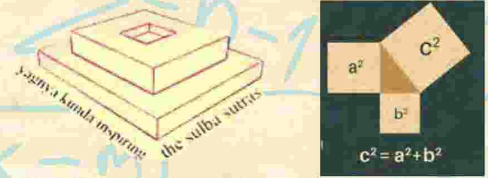

Maharshi Baudhayana was an Indian mathematician.

Even before Pi was given its official name and the Pythagorean theorem was first used, Maharshi Baudhayana had already referred it in his book '**Baudhyayana Sulbasutra**'.

In Sulbasutra various formulations for constructing **Vedi (Altars)** are mentioned. It contains valuable information about geometry.

"दीर्घचतुरश्रस्याक्षया रज्जुः पार्श्वमानी तिर्यग्
मानी च यत् पृथग् भूते कुरुतस्तदुभयं करोति ॥

In **Baudhayana theorem**, A rope stretched along the length of the diagonal of a right angle triangle produces by itself the same area as produced by its both sides (i.e. height and width).

● Maharshi Aryabhata

Maharshi Aryabhata was a great Mathematician, Astronomer, Astrologer and Physicist. He wrote a book '**The Aryabhatiya**' which is the collection of advance mathematical concepts that includes decimal system, number theory, geometry, trigonometry, algebra and astronomy.

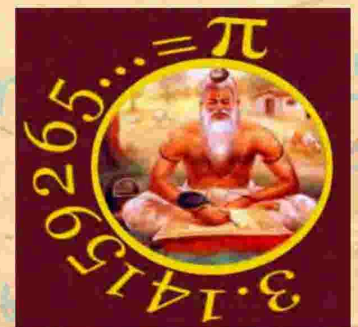

The work is divided into three sections:

Ganita (Mathematics), **Kala-kriya** (Time Calculation), and **Gola** (Sphere)

In **Ganita**, Aryabhata named the first 10 decimal places and gave algorithms for obtaining square and cubic roots, using the **Decimal Number System**. Then he treated geometric measurements - employing $\pi = 3.1416$ value which is very close to the modern value (3.14159). Mathematical series, quadratic equations, compound interest, proportions (ratios), and the solution of various linear equations are among the arithmetic and algebraic topics included.

With **Kala-kriya** he turned to astronomy - in particular, treating **planetary motion along the ecliptic** (the great circle that is the apparent path of the Sun among the constellations in the course of a year) . The topics include definitions of various units of time, eccentric and epicyclic models of planetary motion.

The Aryabhatiya' ends with spherical **astronomy in Gola**, where he applied plane trigonometry to spherical geometry. Topics include **prediction of solar and lunar eclipses** and an explicit statement that the apparent westward motion of the stars is due to the **spherical Earth's rotation about its axis**. Aryabhata also correctly ascribed that the **luminosity of the Moon and Planets** is due to reflected sunlight.

0.00

The Invention of '**Zero**' was his most notable contribution in the field of Mathematics. It lead him to calculate the distance between Earth and Moon.

। उद्यानं ते पुरुष नावयानम् ।

'GO BEYOND ALL LIMITATIONS'

Mathematics

● Maharshi Brahmagupta

Maharshi Brahmagupta was an Ancient Indian Astronomer and Mathematician, whom we have to be thankful for discovering the properties of 'Zero' precisely.

He was the director of **Astronomical Observatory of Ujjain**, The Center of Ancient Indian Mathematical Astronomy.

He wrote four books about astronomy and mathematics, the most famous one is '**Brahma-Sphuta-Siddhanta**'.

He mentioned the **length of a year** as 365 days 6 hours 12 minutes 9 seconds.

He also calculated that **Earth's circumference** is around 36,000 km (22,500 miles).

Maharshi Brahmagupta established the rules for working with positive and negative numbers.

● Maharshi Bhaskaracharya II

Maharshi Bhaskaracharya II was an Indian Mathematician and an Astronomer who extended **Brahmagupta's** work on number systems.

There are six well known works of Bhaskaracharya II. They are :

- **Lilavati** – Mathematics
- **Bijaganita** – Algebra
- **Ganitadhyaya** – Mathematical Astronomy
- **Goladhyaya** – Sphere
- **Karnakutuhala** – Calculation of Astronomical Wonders
- **Vasanabhasya** – Bhaskara's own commentary on **Siddhanta Shiromani**
- **Vivarana**- Commentary on **Shishyadhividdhidatantra** of Mathematician and Astronomer Lalla.

मरुच्चो भूरचला स्वभावतो यतो, विचित्रावतवस्तु शक्त्यः॥
आकृष्टिशक्तिश्च महीतया यत्, खस्थं गुरुस्वाभिमुखं स्वशक्त्या।
आकृष्यते तत्पततीव भाति, समेसमन्तात् क्वपतत्वियं खे॥
- भुवनकोश-गोलाध्याय, सिध्दांतशिरोमणि

In his treaties **Siddhanta Shiromani** he wrote on Planetary Positions, Eclipses, Cosmography, Mathematical Techniques and Astronomical Equipments. In the **Surya Siddhanta** he highlighted the **Force of Gravity**.

There are many more **Great Rishis** who had contributed immensely in the field of **Mathematics and Astronomy**.

Marshi Bhadrabahu, Umasvati, Yavaneśvara, Vasishtha Siddhanta, Yativrsabha Varahamihira, Yativrṣabha, Virahanka, Brahmagupta, Bhaskara I, Shridhara, Virasena, Govindasvāmi, Prithudaka, Śāṅkaranārāyaṇa, Vaṭeśvara, Mahavira, Jayadeva, Vijayanandi, Halayudha, Śrīpati, Abhayadeva, Brahmadeva, Pavuluri Mallana, Hemachandra, Bhaskara II, Someshvara III and many more..

The Mathematical contributions gifted by the Ancient Rishis to the world

Zero, Algebra, Trigonometry, Decimal system and Quadratic formula, Fibonacci Numbers, Length, Weights, Geometry, Infinite series, Binary Code, Chakravala The Method Of Algorithm and Encoding.

'WHEN YOU DESIRE NOTHING, UNIVERSE GIVES YOU EVERYTHING'

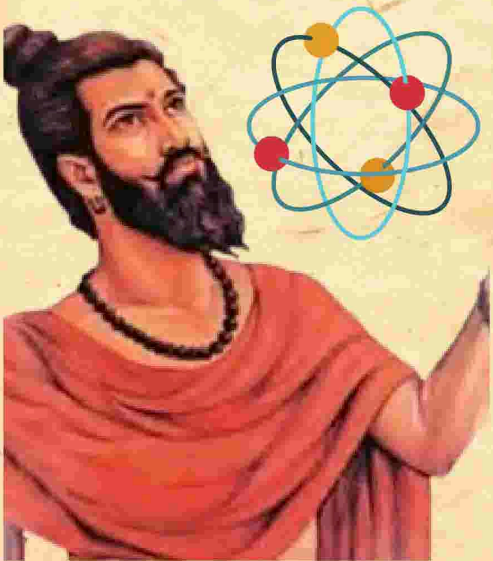

Science

● Acharya Sushruta

Father of Indian Medicine
Father of Cosmetic Surgery

Sushruta Samhita, written by **Sage Sushruta** is the earliest medical encyclopedia known to the world, containing **184 chapters** having etiology of **1,120 illnesses**, **700 medicinal plants**, **64 preparations from mineral sources** and **57 preparations based on animal sources**. You name a disease and it has a chapter on it.

It also has instructions for performing scores of surgical procedures including **three types of skin grafts** and **reconstruction of the nose**.

● Maharshi Kanad

Maharshi Kanad, an ancient Indian sage, scientist and philosopher propounded an **Atomic Theory of Matter**, to explain the creation and existence of the universe. Our Rishi first conceptualized the idea that matter consists of indivisible units which cannot be further divided into smaller particles. The smallest particle, i.e. atom pervades the entire universe. It cannot be destroyed and it retains its original form under all situations.

Maharshi Kanad penned down his explanations in his book '**Vaisheshika Sutra**' also termed as '**Kanad Sutras**'. This book is a blend of science, philosophy and religion.

Some of the major ancient scientific inventions are:

Dentistry, Ayurveda, Ancient Flush Toilet System, Crucible Steel, Cataract Surgery, Wootz Steel, Smelting of Zinc, Plastic Surgery, Civil Engineering and Architecture, Production Technology, Ship Building and Navigation etc..

'START YOUR JOURNEY FROM ZERO TO INFINITY'

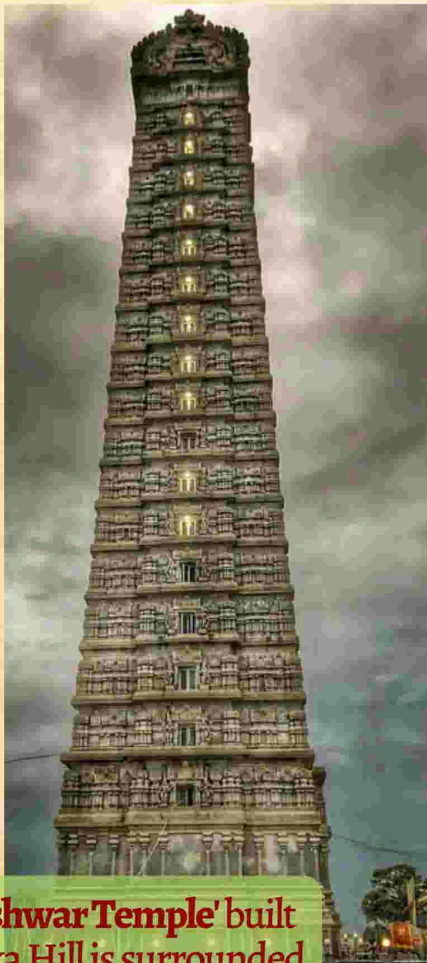

Magnificence

The iconic '**Stone Chariot**'. This magnificent chariot is inside the Vittala Temple Complex, Hampi.

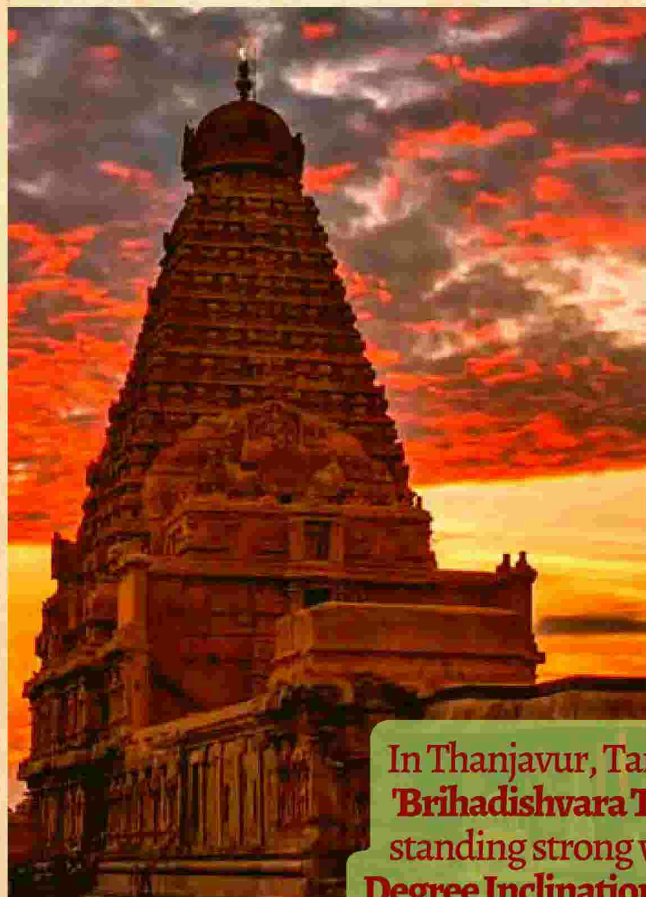

This '**Swarga Mandap**' of Kopeswar Temple, Maharashtra is built by keeping in mind the phases and directions of the Moon. Once a year on the day of '**Kartika Poornima**' the Moon appears exactly in the middle of Swarga Mandap.

The '**Murudeshwar Temple**' built on the Kanduka Hill is surrounded by the Arabian Sea on three sides.

A **20-storeyed Gopura** is constructed on top of the temple. It is **249 feet tall** and is considered as the '**Tallest Gopura in the World**'.

In Thanjavur, Tamil Nadu, '**Brihadishvara Temple**' is standing strong with '**Zero Degree Inclination**' even after 1000 years and 6 major earthquakes.

। न कालमतिवर्तन्ते महान्तः स्वेषु कर्मसु ।

'THE KEY WHICH LOCKS THE DOOR, CAN ONLY UNLOCK IT'

Precision

Half-Turned Foot

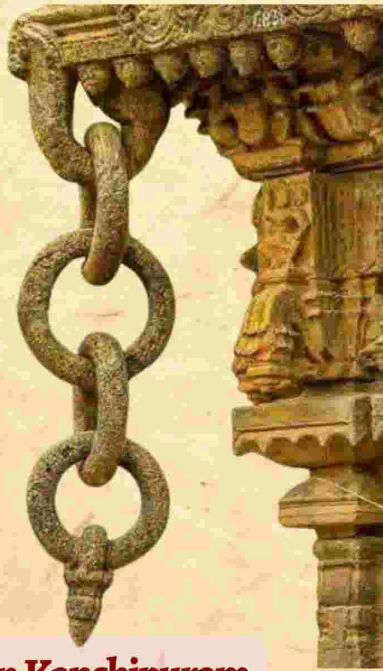

In the stone observe how the sculptor has brought out the details (vein) in stone of Hoyasaleshwar Mandir, Halebidu, Karnataka.

Ancient technology that leaves you speechless!

Just imagine drilling **0.5 mm hole** in granite about **400 mm long**.

Try it today to see if it is possible.

The **Stone chain** in **Kanchipuram Varadaraja Perumal Temple** is a single-stone carved chain made without any joints.

Terrific '**Ugra Narasimha**' Killing Hiranyakashipu, Belure, Karnataka. 'Intricate details like dragging out free hanging Intestines on stone is mind blowing'

Our ancient temples are places for Dharma, Artha, Kama and Mokshya.
Our ancestors built infinite, unthinkable, unbelievable stone stories and wonderful architecture.
We urge all Indians to regularly visit our ancient temples with kids.

'YOUR KARMA WILL DECIDE WHEN AND HOW A
DESIRE WILL BE FULFILLED'

A Sage (ऋषि)- 'The Scientist'

The Rishis are the ones who gave us our heritage, our culture and our way of life known as '**Sanatana Dharma**'.

Rishis are '**Great Yogis (Sages)**', who after **Intense Meditation (Tapas)** have realized the Supreme Truth and Eternal Knowledge, which they have composed into hymns of Vedas and Mantras.

The Rishis are higher order Scientists who discovered colossal amount of information about '**Cosmos**' and '**Nature**' without using modern equipments of present times.

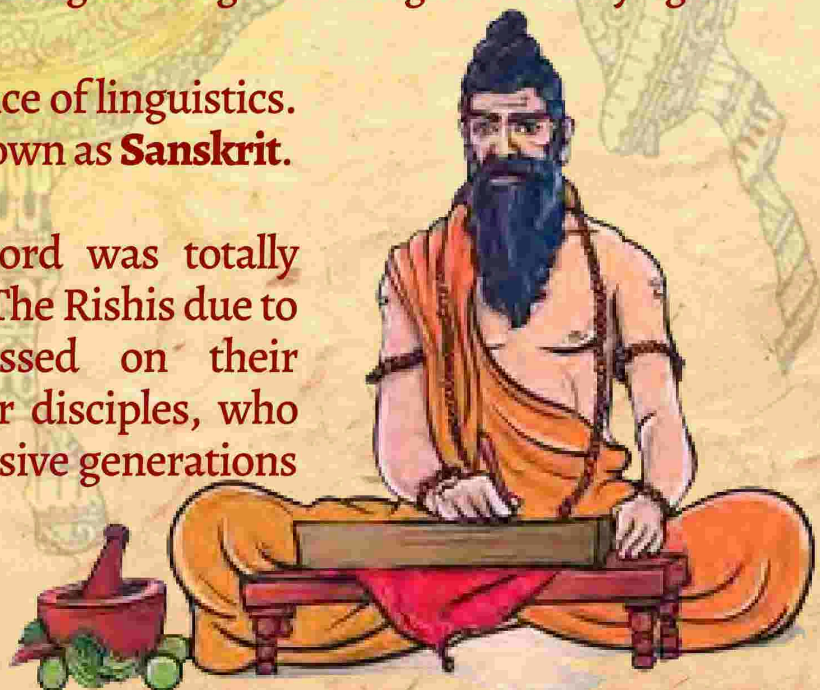

They are indeed the **first scientists**, physicists, botanists, doctors, surgeons, engineers, architects, sculptors, artists, teachers, preceptors and spiritual guides. They are great astronomers and astrologers. Their knowledge is not just theoretical but is applied practically in every aspect of human life.

The knowledge which the Rishis accumulated eventually came to be known as the **Spiritual Science** also called as **The Sanatana Dharma** (Ancient Law of Righteousness). They ensured the constant renewal of India's spiritual tradition and culture by taking birth again and again in every age.

Rishis have command on the science of linguistics. They speak a sublime language known as **Sanskrit**.

In an age when the written word was totally unknown to the rest of the world, The Rishis due to their stupendous memory passed on their knowledge of **The Vedas** to their disciples, who further passed it on to their successive generations which is called

'Guru-Shishya Parampara'.

'MEDITATION TECHNIQUES AS A PRACTICE RAISES YOUR CONSCIOUSNESS LEVEL AND ELEVATES YOUR MIND TO HIGHER LEVEL OF PEACE AND TRANQUILITY'

You must be wondering by now

How it was possible for Rishis

to discover the facts, theories and principles of Science,
Physics, Mathematics, Medicines, Cosmology, Astronomy,
Astrology and Technology many many years ago...??

Answer is

MEDITATION

THE HIMALAYAN MEDITATION

ऋषि कहते हैं..

अहं कृष्णदास: !!!

THE HIMALAYAN MEDITATION
