NATO OTAN		**NSA**

MILITARY COMMITTEE JOINT STANDARDIZATION BOARD (MCJSB)

6 July 2005   NSA(Joint)0687-INT/1059

MCJSB

STANAG 1059 INT (EDITION 9) (RATIFICATION DRAFT 1) - CODES FOR GEOGRAPHICAL ENTITIES

Reference:
NSA(JSB)0221-INT/1059 dated 19 February 2004 (Edition 8)

1.   The enclosed STANAG's ratification draft has been prepared by the custodian (ITA) for circulation to obtain national ratification.

ACTION BY NATIONAL STAFFS - RATIFICATION

2.   Ratifying Reference. Nations prepared to ratify the STANAG are requested to include in their reply, a single co-ordinated national ratifying reference number, which will be recorded at NSA and made available on the NSA websites.

3.   Implementation/NATO Effective Date (NED). It is important that all participating nations implement this STANAG on the same date. Nations are requested to specify the earliest date by which they can implement, which may be stated as a number of months following promulgation of the STANAG. The MCJSB will then establish the NED.

4.   Reservations. Nations prepared to ratify the STANAG but with reservations, are requested to state these in detail, so that they can be recorded at NSA and made available on the NSA websites. Nations should describe any portion of the STANAG which cannot be implemented and/or any portion which can only be implemented with limitations. (As this is implicit, Nations need not state, "This STANAG is applicable only to future procurement").

5.   Non-Participation. Nations may elect to be registered as 'Not Participating' and may indicate (or revoke) such status at any stage of the validation process. A nation's non-participation will be taken into account by the TA when setting/reviewing promulgation criteria for the STANAG and 'non-participating' nations will be expected to make a fresh declaration at the issue of each new ratification draft.

6.   Non-Ratifying. Nations not wishing to ratify the STANAG are requested to indicate their intention and if possible give their reasons for not ratifying, or their suggested changes, which would make it acceptable. Non-ratification by a nation is not to be construed as a bar to the promulgation of the STANAG.

ACTION BY NATIONAL STAFFS - IMPLEMENTATION

7.   After the STANAG has been implemented, nations are to complete the appropriate annex of AAP-3 and forward this to the relevant TA. The TA will also monitor the intended dates of implementation provided by nations and may seek confirmation of the date of implementation if responses have not been provided by nations.

ACTION BY THE NATO STRATEGIC COMMANDS (SCs)

8.   SCs are requested to review the agreement and forward their comments.

FORWARDING REPLIES

9.   National staffs are to complete the appropriate annex of AAP-3 for replies and forward it through their national delegation as appropriate. SCs are to forward their replies in accordance with Command Operating Instructions.

10.   Replies should reach the Joint Branch NSA by **06 October 2005.**

NATO STANDARDIZATION AGREEMENT
(STANAG)

CODES FOR GEOGRAPHICAL ENTITIES

Annexes:
A. Codes for Geographical Entities
B. Temporary Codes (for use pending resolution)
C. Exercise and NATO Command Codes
D. Codes for Large Geographic Groupings
E. Codes for Water Bodies
F. Liste alphabétique des entités géographiques (French STANAG only)

ISO 3166-2	-	Codes For The Representation Of Names Of Administrative Divisions.

AIM

1. The aim of this agreement is to provide unique sets of codes for use throughout NATO to distinguish geographical entities, nations and countries. It also provides standard NATO commands codes and Exercises codes.

BACKGROUND

2. NATO is committed to using Open Standards (ISO / COTS etc) wherever possible. This edition of STANAG 1059 reflects a decision by the NATO Committee for Standardization (NCS)and the Military Committee Joint Standardization Board (MCJSB)[1] regarding the interim use of 'current' NATO 2 and 4 - character codes in Automated

---

[1] *NCS agreed on 25 Jan 05, MC(JSB) approved on 17 Feb 05.*

Information Systems (AIS) only, until the full implementation of the ISO-based Open Standard is technically possible.

AGREEMENT

3.   Participating nations agree to:

a.   Use the codes shown in the Annexes to this STANAG, whenever it is appropriate to use codes to identify geographical entities, nations, countries, administrative divisions or NATO Command entities, as follows:

(1)   Use the 3 or 6-character codes wherever possible in NATO AIS, publications, documents and orders, that is:

(a)   3-character codes for countries, NATO higher commands, large geographic groupings and water bodies.

(b)   6-character codes for provinces, domestic/administrative regions and subordinate NATO commands.

(2)   Use the 2 and 4 character codes within NATO and national AIS, until a change to 3 and 6 character codes is technically possible.

DETAILS OF THE AGREEMENT

4.   The ISO Agency normally reviews its codes every three months. Substantive changes will be notified by the Custodian through the STANAG change procedure. In cases where there no ISO code is shown for a geographical entity, the appropriate Temporary Code shown in Annex B is to be used.

5.   In cases where ISO 3166-1 does not provide a suitable code, ISO-like codes have been generated. In the case of Water Bodies, an additional "hyphen", filler-character has been added. The 3-character code for water bodies has been introduced as a transition mechanism to allow the Open Standard for maritime codes to be used in the future.

6.   Wherever the ISO 3166-2 code for a province or administrative division does not contain 6 characters, additional filler characters (one or more "hyphen" characters e.g. "-" or "--") have been added to the ISO 3166-2 code in order to facilitate implementation.

7.   Alternative names or spellings of provinces are shown in brackets; and accented letters in place names have been replaced with letters from the English alphabet.

8.   Exercise Authorities will generate and assign exercise geographical codes as required, each to begin with the character "X". Current exercise codes are shown at Annex C.

9. <u>Substantive Changes From Edition 8</u>:

    a.   Removal of ISO 2-letter codes, reflecting the NCS/MC(JSB) decision.

    b.   Standardisation of ISO 3166-2 Province code field length to 6 characters.

    c.   Use of current NATO, 2 and 4-character codes **only** for AIS, as an **interim** measure until all systems have been converted to be able to use the ISO-based 3-letter system.

    d.   Introduction of ISO-based codes for use where ISO does not have appropriate codes.

    e.   Comprehensive, one-to-one relationships between unique 2 and 3-character codes and between unique 4 and 6-character codes.

<u>WAY AHEAD</u>

10.   Nations are encouraged to update, as soon as possible, current AIS to use the 3 and 6-character codes wherever practicable, and ensure that all future systems are designed to be compatible with 3 and 6-character, ISO-based codes. All AIS using the 3 and 6-character codes must be "backwards compatible" with the appropriate 2 and 4-character codes to ensure compatibility with the current systems. The aim is to dispense completely with the use of the current, NATO-specific, 2 and 4-character codes; and once all NATO and NATO-related national systems are using the 3 and 6-character codes, Edition 10 of STANAG 1059, containing only the 3 and 6-character ISO-based codes, will be published.

<u>IMPLEMENTATION OF THE AGREEMENT</u>

11.   Nations agree to implement this STANAG on promulgation.
