- Managing software development project teams of 200+ project resources and project budgets up to $18 Million.
- Concurrently managing multiple large software development projects that include defining strategic direction and managing scope definition, schedule, project team, change and risk management, and budget.
- Projects have encompassed conception to implementation of enterprise-wide high-availability and release management reengineering, fraud prevention, risk mitigation, production support and internal customer relations improvement, Wholesale Internet Banking applications, new Wire Transfer System, Data Center migration, and Infrastructure for off-shoring.

Brabec Technology Solutions   January 2002 – Present
Founder

Brabec Technology Solutions provides long-term technical strategy planning and enterprise architecture consulting for financial management and banking institutions.

- Provide formal instruction, mentoring and support for successfully organizing the overall functional flow of n-tier applications and implementing best practices for creating detailed architecture diagrams, flow charts, functional templates, and performing enterprise architecture analysis.
- Design, develop and implement emerging technologies and technical solutions to support e-Commerce applications.
- Create long-term technical strategy plans, and enterprise and application architecture designs geared to prevent fraud and lessen risk for Financial Services Companies.
- Senior Instructor for beginning, intermediate and advanced Program and Project Portfolio Management, Project Management, Strategic Architecture and Design Techniques, Rational Unified Process Enterprise Integration, and preparation for the Project Management Institute Project Management Professional exam.

T. Rowe Price Associates/HorizonGuide   September 2000 – January 2002
Chief Technology Officer/Architect (Vice President)

Primary Development Owner responsible for successfully designing, building and implementing a full-service 401(k) rollover marketplace with complete Customer Relationship Management infrastructure.

- Managed architecture and development teams (22 reports) in the design, development and implementation of HorizonGuide.com, and a Business Development team of four.
- Responsible for all aspects of the development lifecycle including establishing and enforcing development and implementation processes, procedures and methodologies.
- Designed and built an architecture that enables business partners to make real-time changes to production website and implemented reliable change management to ensure proper real-time changes.
- Evaluated vendors, negotiated contracts, and designed and implemented the operational infrastructure.
- Managed initial development and annual budget of $3.2 Million.

U.S. Bancorp (Through Cambridge Technology Partners)   August 1999 – September 2000
    Senior Development Manager (Vice President)

Owner of Online Retail Banking Architecture and Development responsible for stabilizing and enhancing the corporate Internet presence (Retail and Commercial Banking and Loans, Brokerage, and Mortgage), and designing and developing the front and middle tiers of U.S. Bancorp's new online bank. Project budget was in excess of $425 Million and provided the sole strategic technical platform for all corporate e-Commerce banking services.

- Managed enterprise and application architecture, development, and production support teams (70 reports) to design, develop, implement and support Business-to-Consumer and Business-to-Business eCommerce products, and Customer Relationship Management solutions.
- Responsible for all aspects of development management to include establishing and enforcing development processes, procedures, methodologies, and capacity, resource and budget planning.
- Established and oversaw development and production support for all of U.S. Bancorp's retail online presence.
- Built and implemented an extensible Java development environment to support future application efforts including UBank$^©$, online Trust and Wealth management portal, online Card Services, and Bill Pay.
- Achieved a 21% reduction in operating costs with development budget of $63.4 Million.

The Boeing Company   December 1996 – August 1999
    Development Team Lead

Managed and trained eight web developers in designing and developing financial system integration applications and intranet and extranet sites to support the Boeing Commercial Airplane Group's implementation of Baan ERP.

- Coordinated with clients in building and defining requirements to determine purpose, audience, key points, and essential principles to design web sites and web-based training.
- Ensured web development was completed according to schedule by determining critical paths and evaluating, prioritizing, and scheduling multiple assignments.
- Supervised the writing, editing and publishing of architecture and software design standards, implementation documentation, web style guides, and operational procedures on the intranet.

U.S. Army   June 1992 – June 1996
    Team Lead

Supervised eight technicians performing network support, and computer upgrades and repair.

- Managed systems support and upgrades of 450 Windows and UNIX workstations; repair of software and hardware of UNIX (IBM and Sun) and PC workstations and servers; system networking; communication control LAN/WAN centers; portable electronic warfare computers and stations; telecommunication terminals.
