2.1	Updated (minium/recommended)	16-06-2014	L. Bartos
2.2	Updated (forword still mentioned 6.1.1)	08-08-2014	P. van Soest

## **Foreword**

This document describes the minimum and recommended hardware and software requirements for LOGFAS 6.2.0. The recommended requirements are almost always of a significantly higher level than the minimum requirements, and represent the ideal situation in which to run the software. Generally speaking this is a better guideline than minimum system requirements in order to have a fully usable and enjoyable experience with a software.

## Prerequisites

-Administrative permissions to install software.

## LOGFAS Client

### System Requirements

Component	Minimum	Recommended
<b>CPU</b>	Intel Core i3	Intel Core i5
<b>Memory</b>	4 Gb RAM	
<b>Hard disk free space</b>	2 Gb	5 Gb(or more depending on the expected size of the database)
<b>Media</b>	DVD Player (only for installation)	

- The workstation usually stores local databases, the size of the database is depending on the usage of the LOGFAS system.

### Supported Operating Systems

- Windows 7 SP1 / 32Bits & 64Bits
- Windows 8.1 64 bits

## LOGFAS Server:

### Minimum Hardware requirements

Component	Minimum	Recommended
<b>CPU</b>	Intel Xeon E3	
<b>Memory</b>	8 Gb RAM	16 Gb
<b>Hard disk free space</b>	10 Gb (20 GB if convoy tracks are received)	50 Gb
<b>Media</b>	DVD Player	

- The server consists of a database, the size of the database is depending on the usage of the LOGFAS system.

### Supported Operating Systems

- Server - 64Bits
  - Windows Server 2008 SP2
  - Windows Server 2008 R2 SP1
