Victoria Nuland: Ukraine has biological research facilities which, in fact, we're now quite concerned Russian troops, Russian forces may be seeking to gain control of, so we are working with the Ukrainians on how we can prevent any of those research materials from falling into the hands of Russian forces should they approach.

Sen. Marco Rubio: I'm sure you're aware that the Russian propaganda groups are already putting out there all kinds of information about how they have uncovered a plot by the Ukrainians to unleash biological weapons in the country, and with NATO's coordination. If there is a biological or chemical weapon incident or attack inside Ukraine, is there any doubt in your mind that 100% it would be the Russians behind it?

Victoria Nuland: There is no doubt in my mind, senator. And in fact, it is a classic Russian technique to blame the other guy for what they are planning to do themselves.

Until then, the US government and media outlets had dismissed evidence of biological research laboratories as [Russian disinformation](#) and [QAnon conspiracy theory](#).

Despite Nuland's confirmation, Biden Administration officials continue to insist the claims are false.

White House spokesperson posted a lengthy Twitter thread calling the claims "preposterous" and "disinformation," however declining to address the comments made by Nuland.

We took note of Russia's false claims about alleged U.S. biological weapons labs and chemical weapons development in Ukraine. We've also seen Chinese officials echo these conspiracy theories.

Gaytandzhieva [reported](#) in 2018 that the US embassy in Tbilisi, Georgia, was complicit in secretive military programs and that Pentagon scientists had transported “frozen human blood and pathogens as diplomatic cargo for a secret US military program.”

These scientists were “given diplomatic immunity to research deadly diseases and biting insects at the Lugar Center – the Pentagon biolaboratory in Georgia’s capital Tbilisi,” she wrote.

Cohen and Gaytandzhieva also discussed censorship policies implemented in the European Union, and the recent pledge of Bulgarian Prime Minister Kiril Petkov’s comments that Russia “looks like a Petrol station with rockets.”

Despite Petkov’s remarks, he has [asked](#) that the European Union exempt Bulgaria from sanctions on purchasing Russian gas and oil, which his country is totally reliant on.

Petkov also offered to send Bulgarian military equipment to Ukraine.

“After Bulgaria joined NATO, we were told to destroy everything so we would be totally reliant on NATO,” Gaytandzhieva explained.

Russian propaganda? What part ? We know that the labs exist and they are being funded by our government. We know it is a criminal act or it would be done in America. The government isnt into saving money so outsourcing for cheap labor isnt the reason. This was mentioned in the Hunter Biden laptop. Is this why they tried to impeach Trump for being nosy ?

We also know that the government was funding gain of function experiments in Wuhan. For what reason would someone take a deadly virus not contagious to humans and make it so that humans could be infected by it ? I think there is something they aren't telling us.

Why were the labs not in Cleveland? Or Pittsburgh? Or Atlanta? Or Washinton DC? They just happen to be in China and Ukraine? Right on Russia's boder? Anyone who still won't realize that the United States is the world's greatest threat, grow up. They were researching viruses to prevent diseases.? Yeah, right. Our government really cares about its citizens, yeah, thaat's why it was reasearching. Believe that and I've got a bridge in New York I'll let you have real cheap. Americans should expect a Nuremburg type trial when things finally settle. The american military are today's Nazis, and anyone supporting them should be considered war criminals.
