 → power -

Net zero Path

Pathway requires is drastic

Net even across the planet

CO₂ savings relationship is den

If we don't stop CO₂ going up, temp goes up

Target numbers for temperature and then for
debt-related effects

Sahara will move south

All models have wide intervals

It requires nearly concerted effort
Coping

Adaptation - Can you use renewables

energy storage

1% of carbon ~ 10% of world's, it's

80% of 1990 levels by 2050

Inputs are not included

→ so we have natural CO₂ going down

We have shown

Traffic decrease

by 1990 is a way of storing energy
chemical storage is the same as
batteries storage

trees & parkland
