Down

If we train people to get out of this
could it just be about making another name -
Richter people have a version language
Either we are going to be a crisis or we have one
out of sight. If we can get that / then send out we
can sort out Shimen. Shimen not, maybe days in
advance of, the political team not engaged in Shimen.
It's a crisis - many consequences for British state can be
if we are - paper taken

Method of work

If public are divided -
try see the better to talk to security and public leader
first

Try are too comfortable
I'll go straight on the side
We need to mean to avoid - decrease the
risk
provide the advice to get out of this current
situation

The message we are trying is that for
the optimum - people who need to work

Observe

What countries are
doing the same as?

need to get back control of the situation
need to stand back & see what's going on & control

do whatever what to do - and cross of hope
to do not =

8/8

that doesn't seem to
be - 20 other attend

No - it's not his business

unfairness - Lib Dems in 2019

By what we're to learn in dealing w. Coronaviruses
managed by it
doing it best in unprecedented situation
no job with some of people to do it differently from
Coronaviruses

Whether Dr. Cunniff did or didn't do was not part of
it's determination to handle coronaviruses

equally under the surface

the unprecedented -

Wednesday 27 May 2020

A preliminary batch of answers - proceed w. caution

Paul Dignan - order of translations to actual deliveries
Now for 5 to 6 more from 6%.

Paul D. Need to make order to make copies for
with care phrases & duplications
to good use

People moving - pen test, lecture
densities of people making into public spaces
mobile trends

fusion in the street

people need to go back to their role of group behavior

still Patrick V. : a high degree of compliance

— the more we signed to some thing it people
do even more.

there are measures or consequences

The first time we have used a new instrument

to = you need to
get a test

if you have symptoms
ever, new persistent cough or
loss of taste or smell

if you're contacted by NHS
to trace you should
attend to advice

is with more as the
national lockdown is
continued is shut.

will reduce the
of lockdown

is now U-5 as well
rule - done -
as tests via a national
preparation

NE The public have followed
the guidance & they have
confidence

- only advice is as the Gov

Pido

Black you mean by that if US are forced to help - I think
US won't know it

US life compliance rates

History

Reduction of ~~the~~ US

Set term contracts or fix returns

Stimulus to sick pay

65% get more than ordinary sick pay

Further programme not meant to help with that

Spending more resources but France they spend
have stuck w. it

2 we are likely to be doing

More involved than after 1975 & we have done

If you have had a car
you will have a call w. a division

Whether app is voted out -

APP

There is a risk: Crisis & Profit

Time is but money

No hoax calls -
risk of scamming

5
a negative test on day 7 might mean
you're positive then days 8-12

✓ you did test on day 10 you may be able
to release him

what is the probability of someone who has
virus & doesn't know it?

perhaps It all depends on the number
into large numbers

2000 cases & 30 children
300 people in school

→ Contains it at the top end

cb → it was 12

500,000 by end of September

rah-jam

→ You can avoid isolation if you

→ If you see the symptoms you must

→ This isolation is the price of a few
hundred to a few thousand - it will be considered
to release him for exposure

NHS 80,000 antibody test

The trial a test lot of crypt

Demand

These questions are a demand
which has caused confusion
may be the best

press
me - a global system
could be constant in China
as was
I wanted to explain it
that it was for S/E Asia
a certain point it was
even to be used in the
the car system it is China
then 10,000 cars
1000 deaths

It was clear on
day to explain it was
N 2000 cars

I didn't do
I can't do but a few
me - my mind

system
we did have less cases
S Korea / China
we had to concentrate
disease in hospitals

did not have capacity
to work

to build but
franchise before

again, we would have
paid & didn't
we

(that
The port would have
improved & didn't
who was seen & that for
break
He is trying to just a network
that was not done
we had no test & trace
capacity

It was a practical

2 separate lines
we didn't have test
capacity
we had test but
was denied by PHE
we were a capacity
for capacity & swabs

It was a matter of
will or money

(2) we didn't have
an intense network of
contact tracers
we had a
me about to do it
in short

Science & Tech
Office - on back of test
Capacity

We did have just lockdown
much earlier

2 sets of legs
What was the correct
combination or the what order

Key element of lockdown
was a cut to services

What was the other perhaps
at that time
More closures were later in
real time it forced people

The Spectator

They had a worse problem -
Country & the bad press

It wasn't just lockdown or
working -

If we'd locked down 9 days earlier
we would have saved

We were
dealing w. a
new disease
unknown v. differently to
of other disease

We hadn't grasped
the degree to which
you could have
presumptive spread

SARS ~~the~~ symptoms
or asymptomatic spread

~~Summary~~

Shuck Case

Monday 5 pm

1st June

COVID → the movement from national to local. Uncentral policies are central. Test/Trace go for 5 days. point business centre up & running. our strategy doesn't show it's like many others, but we are embracing it at a much higher machine gear / Italy did it w. hundreds. we are hoping to come off another way at 2 days.

We are being generous in enforcement. It's a problem driven approach.

Incidence is flat -

We didn't lock down as aggressively as we could -

Matt says we need to prove we are COVID secure in our shops -

We are going to open the shops & hope for the best

I can't take these decisions on basis of better data

We need to enforce guidance

We need some form of enforcement

We should be calling people or public health advice

→ 2030 vision

→ Hy Reg

→ quarantine?

A table with multiple rows and columns is visible on the right side of the page. The table is partially obscured by the redaction on the left. The columns are separated by vertical lines, and the rows are separated by horizontal lines. The table appears to be a ledger or a data table. The right edge of the table shows a series of small, repeating marks, possibly from a binding or a scanning artifact.

Sensitive

A large black rectangular redaction box covers the majority of the page, obscuring all text and graphics. The box is positioned centrally, leaving only the top header and the left margin visible. The word 'Sensitive' is printed in the top left corner of the page, above the redacted area. The left margin shows a series of small, dark, rectangular marks, possibly from a binder or scanning artifacts. The right side of the page shows horizontal lines, suggesting a table or grid structure that is mostly obscured by the redaction.

Byron has access to all EU waters between 12 - 200
It's the ocean

By year ICES decides what the TAC should be

On shares 12 TAC fixed

- we get 25% - and we do

By fish a lot of our value

We have almost various members to hold in London
fisheries convention

6 - 12

0 - 6 no quotas

Under 600 tons < 600 tons

French would lose a $\frac{1}{4}$ Belgium 50%

New Times Green!
We will control access annually

EU - Norway has only a degree order

What are these quota shares

joint attachment

it would put 40-45%
the tax 25%.

Two - agreement we w

we fish in our waters
you have a fishing cap.

Don't see Curacao's

deal = but difficult to police

transition for 25-45%.

Wanted to CEP to the aqua?

fishing industry would wear a sub
vention period

the stocks more important to fishers
needs

25% extends to 6-12

agrees to Scottish fishing lobby

policy of the waters must be modified &
end

Pharm

don't have any other concepts
and the Channel

There is a lot of things in there

STs

- 1) joint attachment
- 2) annually ?
- 3) separate agreement

School agriculture - the cost of it
land tanks

BC

It wasn't really do anything

Worked on Monday. Clare Gardner with the team at the Monday

What we get the data - How do we make decisions

OK code How do we integrate the system

0100

— JBC KL & trace

Wash Super

Corridor

- ① identification of outbreak
- ② boots on ground
- ③ national support

We didn't have enough PHE staff

We have got the best resources but work

More boots on ground

John Rinden - Reduction in initial battle to 152
local to battle

Local capacity not as strong as it used to be

We have had 34 outbreaks in Cambridge,
Oxford, Wiltshire. 2/3 in places where we
have troops already.

If we need to take decision, 15 are taken at York
Level

JBC ~ Local teams are going to become integrated

JBC 1st branch - Local teams are but not in
the front.

Separate but integrated

A field network team, & a regional structure
blended team

JBC - clear guidance

see Israeli - Before JBC
- see where actual data
- see breaks are coming

in waste water samples -

see if data is for NH₃

have an easy dashboard

aka, data
data -

→ heat maps

Can't see it
by what we're seeing it

clean the post code
