

Logistics Information Systems (LIS)

WHAT IS PL LIS?

Chartered Acquisition Manager for Legacy Tactical Logistics Information Systems as Defense Business Systems

Post Deployment Capability Support for:

- Property Book Unit Supply Enhanced (PBUSE)
- Standard Army Ammunition System (SAAS)

WHAT DOES PL LIS DO?

- Ensures cybersecurity readiness of assigned systems
- Maintains effective system interaction with Trading Partner systems
- Provides Help Desk services to SAAS users world-wide
- Align assigned legacy systems as required to ensure effective and efficient migration to objective enterprise capabilities
- Support Special Operations Commands' employment of PBUSE for their property book management of classified equipment

WHO WE ARE

- Managers of legacy logistics systems as a member of the Project Manager Army Data and Analytics Platforms team
- Technical and functional experts in the sustainment and employment of assigned logistics management capabilities

MISSION

Acquisition Capability Support within cost, schedule, and performance for assigned Defense Business Systems IAW DoDI 5000.75 & associated Army policies

FAST FACTS

SAAS is employed at **130** active sites world-wide. Executed **803,625** ammunition supply transactions values at over **\$37.6B** in FY21.

PBUSE ensures **USASOC/SOCOM** ability to meet their statutory property accountability responsibilities until a classified enterprise capability is deployed

The Information Systems Security Officer and Engineering Management Officer facilitate effective **cybersecurity readiness**

TOP GOALS & PRIORITIES

Why we do what we do, every day

- Ensure the continuity of SAAS Receive, Store, Maintain, Distribute, Issue, and Accountability services for ammunition managers at Theater and Below tactical units, as well as Installation, Ammunition Storage Sites, world-wide.
- Meet SAAS's Capability Support Performance Standards as established by the Milestone Decision Authority.
- Sustain functional capability of PBUSE in support of Special Operations Commands' statutory responsibilities for the accountability of their classified property until PEO EIS deploys an objective enterprise capability for classified operations.
- Be responsive to/supportive of PM ARDAP's broader acquisition management responsibilities and requirements
