NATO ARMY ARMAMENTS GROUP (NAAG)

Review of the NAAG Standardization Portfolio

Note by the NAAG Secretary

Reference 1. AC/225-DS(2017)0002, Decision Sheet - Meeting of the NAAG in December 2017

1. At its December 2017 meeting, the NAAG noted a briefing from the NSO Land Branch Head, Col. G. Levato, on the status of the NAAG standardization portfolio. The NAAG particularly noted the following issues:

- 1.1. A number of land armaments standards appear not to have been reviewed for a long period.
- 1.2. There are a number of Allied Publications that are not covered by a STANAG or STANREC.

2. In subsequent discussions, the NAAG noted that:
 - 2.1. In general the NAAG groups regularly review their standards portfolio, however, validations are not always reported for being reflected in the NATO Standardization Database. The NAAG tasked the NAAG Secretary, with support of the Level 2 Groups, to conduct a survey and report the status of such standards for the necessary updates in the NSO Database (Ref.1, Action 43).
 - 2.2. The number of NAAG Allied Publications without covering STANAG or STANREC had diminished from 30 to 13 in 3 years, alongside with an approximately 20% decrease in the overall standards portfolio on a validation and rationalization effort. However the problem still exists. The NAAG tasked the subordinate groups to address the remaining such publications as soon as possible (Ref.1, Action 42). It should be noted that this number is now reduced to 11.
3. During the Spring 2018 meetings, the groups conducted reviews of their standardization portfolios. It should however be noted that the extent and diversity of the land armaments standards is very big, and this review is of a perpetual nature.
4. The aim of this document is to display the results of the on-going reviews versus the status of land armaments standards as portrayed in the NATO Standardization Database, in order to concretize specific actions for the NAAG subordinate groups and the NATO Staff, to achieve the tasks as underlined in Para 2.
5. The attached table at Annex 1 gives the complete NAAG standardization portfolio consisting of 142 active items, as of 18 May 2018. For ease of reference, this table is ordered by custodian Level 2 group. Highlights are used to indicate items requiring actions (excluding those for which actions are already being taken and reported in the "NAAG to note" column):
 - 5.1. the Allied Publications without cover;
 - 5.2. the line items dated and/or indicated as "Reviewed" before year 2010;
 - 5.3. one previously cancelled standard for which work is on-going within the custodian community in order to develop a new edition proposed to be maintained as "Study";
 - 5.4. one standard proposed to be promulgated;
 - 5.5. two standards proposed to be cancelled;
 - 5.6. two standards proposed to be handed over to a different tasking authority;
 - 5.7. other line items for which specific actions are recommended.

6. For a number of line items which could be added to the above-mentioned highlights, the NAAG Structure reported review activities. These are reported in the notes column of the Annex 1 and no specific action was raised.

7. The NAAG is recommended to:

- 7.1. task ICGIF to review validity of STANAG 4683 and report within one year;
- 7.2. task JCBRND CDG to review validity of STANAGs 4328, 4475, 4571 and of the Allied Publication without cover ANEP-57 (Vol.s 1 and 2) and report within one year;
- 7.3. task LCGLE to review validity of STANAGs 4357, 4358 and report within one year;
- 7.4. task MILENG WG MATP to review validity of the Allied Publication without cover AEP-28 and report within one year;
- 7.5. invite NAFAG to task JCGISR to review validity of STANAG 4361 and of the Allied Publication without cover AEP-31, and report within one year;
- 7.6. invite LCMG to consider assumption of tasking authority function for AEP-20 and AEP-21, in addition to the AEP-18 for which the proposal had been forwarded earlier;
- 7.7. in case the Allied Publications without cover are reported to require an updates, task the respective custodian groups to develop work programs with a view to formulate new editions under covers of STANAGs or STANRECs;
- 7.8. task all groups to speed up their review activities for those line items referenced in Para 6;
- 7.9. approve cancellations of STANAG 4678 (LCGDSS) and STANAG 4636 (JCBRND CDG);
- 7.10. approve promulgation of STANAG 4144 Ed.3;
- 7.11. invite NSO to update the "Reviewed" field for STANAGs 2997, 4677 (custodian LCGDSS) and 4009, 4015, 4101, 4195, 4381 (custodian LCGLE) in accordance with data and references provided at Annex 1;
- 7.12. invite NSO to introduce "STUDY" lines for the new editions of STANAGs 4296, 4509, 4512, 4677 (custodian LCGDSS), 4458, 4478, 4569 (custodian LCGLE), and 2835, 2836, 4418 (custodian JCGISR), noting that a number of these could become STANRECs (See Annex 1).

8. It should be noted that this survey's Review Date criterion to generate a recommendation was "Earlier than 2010". The future iterations will possibly apply a more stringent criterion.

9. The recommendations listed in Para 7 are submitted to the NAAG consideration and **approval under a silence procedure ending on 13 July 2018, 12:00 Hours**. If the NAAG Secretary does not receive any objection by this deadline, the NAAG will be deemed to have approved these recommendations and tasked the subordinate structure and/or the NATO Staff Officer for corresponding actions.
