### EVE WEB v6.2.2 - v6.2.3 - v6.2.4

**To** : EVE WEB end users  
**Subject** : EVE WEB – NVG services for networks and routes provide the distance in a wrong scale  
**Reference(s)** :

#### 1. Applicability

EVE WEB 6.2.2 / 6.2.3 / 6.2.4.

#### 2. Problem definition

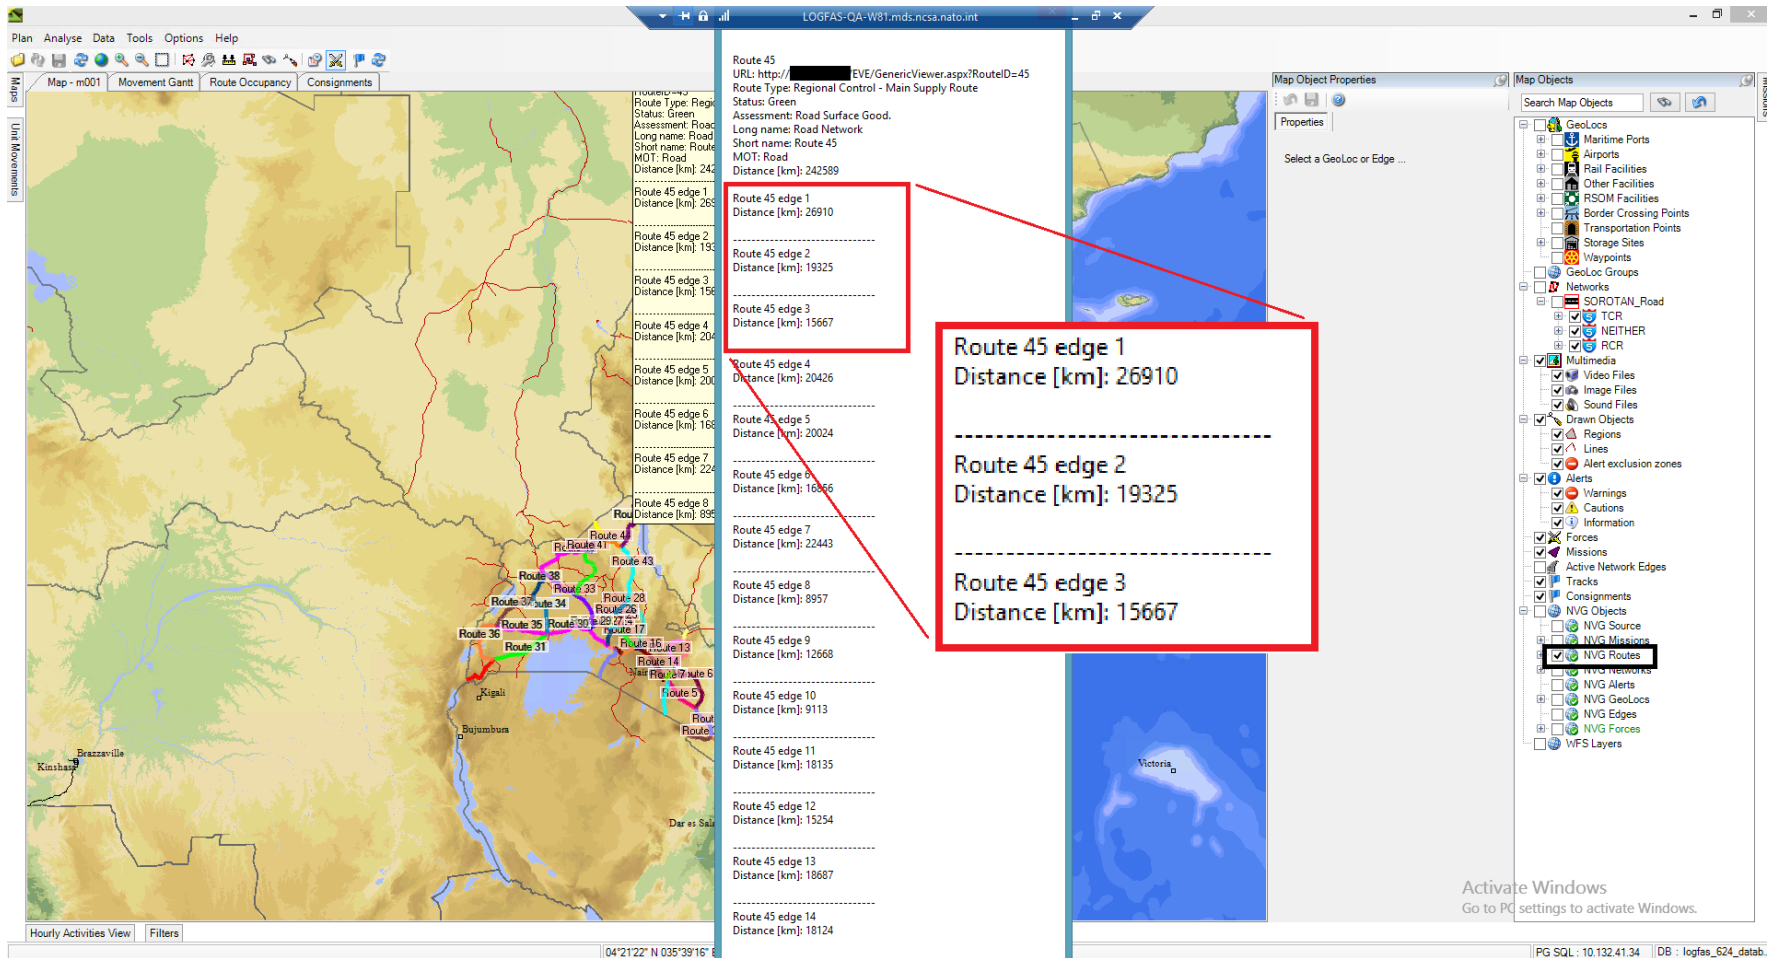

When configuring NVG Objects in CORSOM, the NVG layers for networks and routes provided by EVE WEB server are at the wrong scale. The distance is supposed to be in kilometers but it's actually displayed in meters (Figure 1 on the next page).

#### 3. Workaround

Divide the distance by a 1000 factor will provide the correct distance from these EVE WEB NVG layers.

Figure 1.
