## Logistics Functional Area Services (LOGFAS) v6.2.2

**To** : End user  
**Subject** : Minus Figures Appear in the Item Nestings  
**Reference(s)** :

### 1. Applicability

LOGFAS 6.2.2 (64-bit operating systems)

### 2. Problem definition

When opening a Force Profile & Holdings in LDM minus figures may appear in the Item Nestings. This is caused when the “Act. Onhand” quantities in the Force Holdings are amended, the problem will not be visible at first and can only be seen if the Force Profile & Holdings is refreshed or reopened later.

A minus figure will appear when refreshed or opened later

The Item quantity is changed

### 3. Problem investigation

The Item Nestings figures are not refreshed straight after a change to the Act. Onhand quantities in the Force Holdings, this is causing the minus figure to appear when the Force Profile & Holdings is refreshed or reopened later. This will not cause problems in the LOGUPDATE when using the “NIC centric Force Holdings” as the correct figures are represented here.

### 4. Workaround

To clear the minus figures, select the item in the Items Nesting with the minus figure. Right click on the item and select “Join” from the context menu.
