NDSS Release 3.7.0.0 Notes

1. PURPOSE

The purpose of this document is to introduce to the management as well as users the content of NDSS Release 3.7.0.0.

2. SCOPE

This document is published by NSPA and addresses the NDSS user community. It describes the changes to the NDSS Software and provides NDSS end users and management with useful instructions for the use and implementation of the new functions and/or corrections.

3. SUMMARY OF REVELANT CHANGES

3.1 Next Release details

The build number identifies the exact software configuration reference within a release.

Site(s)	Patch	General Release date
All NDSS Sites	3.7.0.0	4/11/2022

3.2 Overview

Release 3.7.0.0 contains a set of improvements, changes and bug fixes to NDSS software as identified in paragraph 3 with a short description and a reference to the procedure affected.

Moreover this release includes 2 new modules integrated to PAM:

- Project Management and
- Property Disposal Management

The Property Disposal Management module will be available in test mode only for the sites who accepted to be pilot.

3.3 Important notes regarding this patch

Users should pay attention to the following changes in the behaviour of the NDSS release 3.7.0.0 software and should carefully read the instructions below.

4. INSTRUCTIONS TO BE OBSERVED POST INSTALLATION OF THE RELEASE

4.1 Prior to initial utilization of the new procedures introduced in this release, Users / Groups require prior authorization by the local system

NATO UNCLASSIFIED

administrator and / or NDSS Service Desk in the administrative application series "S - Administration".

- 4.2 For PAM users, this authorization is established in the administration module of PAM.
- 4.3 Please educate your staff on the creation of meaningful menu favourites.
- 4.4 Logon Screen: User must enter his/her password and may specify a timeout.

5. AFFECTED PROCEDURES

This paragraph describes the changes included in the current build.

Project Code / Related Mantis Tickets	Procedure	Title	Description
PDO		Property Disposal Management	Property Disposal management MODULE was implemented in PAM, in order to provide better visibility to all parties and to have one single tool from Procurement to Items Disposal. The property disposal management concerns items included in approved ROS and is based on the three following dimensions: disposal method, waste category and entity.
Project		Project Management	Project Management MODULE was implemented in PAM for: 1. Exercise planning: Planning and prepare an exercise, select the corresponding equipment and keep track of equipment/items during exercise period. 2. Short loan: Loan of single Items to Units or Individuals, internally or externally.
8507	PAM AREA	New NDSS logo	New NDSS logo implemented for PAM applications.
8448	PAM AREA	MTM - new filter per price code	New filter added in MTM in order to filter vehicles per price code (Acquisition, rental or lease)

Project Code / Related Mantis Tickets	Procedure	Title	Description
8470	PAM AREA	Inventory Taking ROS	ROS for Inventory Taking appears in PAM <Information Board>
8465	PAM AREA	Overdue ROS highlight	Overdue ROS will be highlighted in <Information Board> (Overdue, is consider a ROS when xx days passed since its printing. xx can be specified by the user in Administration->Configuration->System Options.
8463	PAM AREA	NDSS & PAM functionalities which reduce the stock should be blocked	The below functionalities which are used to reduce the Warehouse stock in NDSS and on hand quantity in PAM are blocked. NDSS->D007 MRIN Actions-> Reduce on hand quantity
8442	PAM AREA	ROS - WAC and Net book values to be considered	When defining a ROS, the following values are available for the Price : WAC -> for inventory (account 15) Net book value (calculated in FinS)-> for fixed assets-PP&E (account 18) A manual entry is required for fixed assets during the ROS creation (provided by the PAO or FAO)
8472	PAM AREA	E-mail Notification for FAO update of ROS	Notification (by mail) is sent to Financial Accounting Officer (FAO), as soon as PAO creates a ROS, to put the Net Book Value for PP&E items. After FAO updates the values a notification is sent back to PAO.
