Requests for help/ Declaration of emergency

**Most esteemed Excellency Donald J. Trump,
appreciated and recognized by the author as Commander-in-Chief and legitimate President**

the author as a non-combatant (civilian) = natural person **last name, first name**
on German soil as financier of our beautiful planet, he sends you this

I appeal to you for help and implore you, by virtue of your office and your extraordinary integrity, to end the occupation on German soil and to hand over sovereignty to the German people, so that everything can be rebuilt.

May the German people finally be a free people again, with free people who make their beautiful landscapes to blossom again, with laughing, happy children safe in their families.
That the German people can finally be reunited with their Russian brothers and sisters as well as the peoples of our beautiful planet can finally be at peace and united...

A free German land of poets and thinkers.

According to international criminal law, civilians = natural persons representing human beings in a war zone are under special protection.

As German soil is still occupied and martial law is therefore in force, the author respectfully requests that the occupation finally come to an end.

With deepest gratitude for having made the great awakening possible for the people of the world under extraordinary reprisals on your part and that of your family, the author would like to emphasize from his point of view, the German people have learned and are ready for change.

The white torture of people as investors on German soil is becoming increasingly unbearable. Parents are forced to put their children in "forced institutions" (schools) and to have them vaccinated against their will. Our senior citizens are mistreated under inhumane conditions in so-called care facilities. Not to mention sexual assaults by migrants on children and women. All of this is ordered by licensees order and/or accept.

The author, along with many other people, has also approached His Excellency Wladimir Wladimirowitsch Putin and asked for help. Also His Excellency Xi Jinping received a request for help.

Please end the occupation on German soil.

The licensees are mercilessly torturing the German people. Legal certainty is impossible. Many honest people have provided evidence to the responsible organizations such as the UPU, the ILO, the IRS, the UN Torture Commissioner and the military.

**Please help, your esteemed Excellency Donald J. Trump
God bless you and your family**

With the greatest respect and fraternal solidarity of our peoples

the sovereign

Sorglos, Susi
