Turk Hack Team Defaces 750 Websites for #OpNoWar

BY **WAQAS** · SEPTEMBER 13, 2013 · ⊙ 1 MINUTE READ

Turkish hackers from **Turk Hack Team** going with the handle of Black-Spy and WhooLe have hacked and defaced total 750 random websites from all over the world under the banner of #OpNoWar.

A member of team contacted me via email explained that purpose for targeting these sites was to deliver a message of peace all around the world. The defaced page on all hacked websites shows the following message:

- **General interest in international disputes, but in the name of good faith and mutual sacrifice is taken care of with the way. The best way to prosperity and happiness of peace Nations! Peace at Home, Peace in the World.**

After analyzing the targeted site, I have found that most of the sites belong to Armenia, France Germany, Israel, Italy, Greece and UK.

Targeted links and mirrors of hacked sites are available **here**.

Turk Hack Team is the same group which had previously hacked 1600 websites **against Chinese Uyghur Muslims Massacre**, several other high-profile government departments from all over the world.

At the time of publishing this article, most of the sites were taken offline while the rest of them were hacked and displaying deface page left by the hackers.
