

# **Pregnant, Postpartum, and Lactating Individuals in Immigration Detention**

Fiscal Year 2022, Semiannual 1

*August 5, 2022*

Fiscal Year 2022 Report to Congress

**Homeland  
Security**

*U.S. Immigration and Customs Enforcement*

# Message from the Acting Director

August 5, 2022

I am pleased to present the following report, "Pregnant, Postpartum, and Lactating Individuals in Immigration Detention," for the first half of Fiscal Year (FY) 2022, which has been prepared by U.S. Immigration and Customs Enforcement (ICE).

This report was compiled pursuant to direction in the Joint Explanatory Statement, which accompanies the FY 2022 Department of Homeland Security (DHS) Appropriations Act (P.L. 117-103).

Pursuant to Congressional guidelines, this report is being provided to the following Members of Congress:

The Honorable Lucille Roybal-Allard  
Chairwoman, House Appropriations Subcommittee on Homeland Security

The Honorable Chuck Fleischmann  
Ranking Member, House Appropriations Subcommittee on Homeland Security

The Honorable Chris Murphy  
Chair, Senate Appropriations Subcommittee on Homeland Security

The Honorable Shelley Moore Capito  
Ranking Member, Senate Appropriations Subcommittee on Homeland Security

Inquiries related to this report may be directed to the ICE Office of Congressional Relations at (202) 732-4200.

Sincerely,

Tae D. Johnson  
Acting Director  
U.S. Immigration and Customs Enforcement

# Executive Summary

The Joint Explanatory Statement accompanying the FY 2022 DHS Appropriations Act (P.L. 117-103) requests semiannual reports on pregnant, postpartum, and lactating women in ICE custody. This report provides an overview of the circumstances surrounding ICE detention of pregnant, postpartum, or lactating women in ICE custody as well as associated statistics. The data provided in this report are for the first half of FY 2022 (October 1, 2021, through March 31, 2022).

# I. Legislative Requirement

This report was compiled in response to direction in the Joint Explanatory Statement, which accompanies the Fiscal Year (FY) 2022 Department of Homeland Security Appropriations Act (P.L. 117-103).

The Joint Explanatory Statement states:

*Pregnant, Postpartum, and Lactating Women.*—ICE is directed to provide semiannual reports on the total number of pregnant, postpartum, and lactating women in ICE custody, including detailed justification of the circumstances warranting each such detainee's continued detention and the length of detention. These anonymized reports shall be made publicly available on the ICE website.

## II. Background

U.S. Immigration and Customs Enforcement (ICE) is committed to ensuring the health, safety, and welfare of people in ICE custody. ICE Enforcement and Removal Operations (ERO) detention standards establish uniform policies and procedures for the safe, secure, and humane treatment of foreign nationals in ICE custody, including pregnant, postpartum, and nursing<sup>1</sup> individuals.

### Pregnant Individuals in ICE Custody

On July 1, 2021, ICE implemented ICE Directive 11032.4, *Identification and Monitoring of Pregnant, Postpartum, or Nursing Individuals*, which states that ICE will not detain, arrest, or take into custody individuals known to be pregnant, postpartum, or nursing unless release is prohibited by law or exceptional circumstances exist. In the very limited circumstances in which detention is necessary and appropriate, this directive requires identifying and monitoring those individuals for general health and wellbeing, including regular custody and medical reevaluation to ensure that appropriate prenatal and/or postnatal and other medical and mental health care are provided and that housing in facilities is suitable for their medical and mental health needs. At least weekly, ICE will evaluate whether continued detention is appropriate and required for individuals known to be pregnant, allowing ICE officers and agents to exercise discretion on a case-by-case basis when determining whether to arrest or detain a pregnant individual.

### Pregnant Individuals' Custody Determinations

When an individual enters ICE custody, ICE makes a custody determination based on a variety of factors. ICE is bound to detain individuals subject to mandatory detention as set by U.S. immigration laws and has limited release discretion when a case is determined to be a flight risk or a danger to the community. These considerations apply to all ICE-detained individuals, to include pregnant individuals. For pregnant individuals who are not subject to mandatory detention, ICE regularly exercises prosecutorial discretion when making custody decisions and considers each case individually, making a final decision based on the cumulative facts of each case. When determining whether to exercise prosecutorial discretion, consideration is given to criminal and immigration history, as well as to known health and humanitarian factors. Accordingly, ICE's custody determinations for those who are pregnant consider factors such as medical issues related to pregnancy, including postpartum or nursing status; ties to the community; prior convictions, including violent crimes; provision of sufficient identity documents; and a final order of removal or history of violating the terms of orders of supervision. These considerations are not exhaustive, and no one factor is determinative.

ICE further notes that pregnant individuals in their third trimester generally are exempted from ICE detention unless it is required legally or is necessary for removal, and only when such removal was cleared by medical professionals. ICE follows medical advice in all cases

---

<sup>1</sup> Nursing is, regardless of the passage of time since childbirth, the act of an individual breastfeeding a child. The terms "nursing" and "breastfeeding" within this report are used interchangeably to refer to lactating individuals.

involving pregnant individuals. As a result, the numbers of pregnant individuals in ICE custody are typically low and the population length of stay in detention is much shorter when compared to the general population. For example, as of March 31, 2022, the average length of stay (ALOS) for pregnant individuals in ICE custody was 6.6 days, compared to the ALOS for ICE's general population, which was 23.9 days.<sup>2</sup>

### **Treatment of Pregnant Individuals in ICE Custody**

ICE strives to ensure that all detained individuals receive timely and appropriate medical care, which may include transfers to facilities better situated to meet the specific medical needs of the individual in custody. In addition to medical, mental health, and dental services provided to every detained individual as required by ICE detention standards, every facility directly or contractually provides eligible individuals with pregnancy services, including pregnancy testing, counseling and assistance, routine or specialized prenatal care, postpartum follow-up, lactation services, and access to pregnancy termination services.

Within 12 hours of arrival, during their initial medical screening, individuals receive information on services related to women's health care as required in ICE's detention standards. If the initial medical intake screening indicates the possibility of pregnancy, a referral is initiated to an ICE Health Service Corps (IHSC) physician or advanced practice provider.<sup>3</sup> The individual receives a health assessment as soon as practicable but generally within 24 hours after an individual in custody is determined to be pregnant, postpartum, or nursing. All initial health assessments are conducted by a trained and qualified health provider. The evaluation requests information about several factors, including pregnancy testing for eligible individuals aged 18-56, and documented results; if the detained individual currently is nursing (breastfeeding); use of contraception; reproductive history (number of pregnancies, number of live births, number of spontaneous/elective abortions, pregnancy complications, etc.); menstrual cycle; history of breast or gynecological problems; family history of breast and gynecological problems; and any history of physical or sexual victimization and when the incident occurred. A pelvic and breast exam, pap test, baseline mammography, and sexually transmitted disease testing are offered and provided by the medical provider.

Upon confirmation by medical personnel that an individual is pregnant, the individual is provided close medical supervision. Pregnant individuals have access to prenatal and specialized care, and comprehensive counseling inclusive of, but not limited to nutrition, exercise, complications of pregnancy, prenatal vitamins, labor and delivery, postpartum care, lactation, family planning, pregnancy termination services, and parental skills education. Additionally, the facility administrator notifies the local ICE ERO Field Office Director as soon as practicable of any individual who has been determined to be pregnant, but not later than 24 hours after such determination for the completion of a custody review, as appropriate. The medical provider identifies any special needs (e.g., diet, housing, or other accommodations) and informs all necessary custody staff and facility authorities. If a pregnant individual is identified as high-risk, the individual is referred to a physician specializing in high-risk pregnancies. IHSC tracks all

<sup>2</sup> Refer to ALOS charts under Section III of the report.

<sup>3</sup> Advanced practice providers are nurse practitioners, physician assistants, and board-certified clinical pharmacists.

pregnant individuals in custody and provides monthly updates to ICE ERO Headquarters and field office leadership.

### III. Data Report

ICE tracks information on detainees’ health conditions, including pregnancy, postpartum, and breastfeeding, to provide necessary health services to those in its custody. To report information about this population, ICE analyzes the medical recordkeeping systems. In the following charts, ICE provides data showing detained individuals at ICE facilities for the reporting period of October 1, 2021, through March 31, 2022. The following data indicates ICE’s initial book-ins of pregnant, postpartum, and breastfeeding individuals in ICE facilities, presented by month and criminality, and the number that were released, presented by the reason for release, for the first half of FY 2022.

**ICE Initials Book-Ins of Pregnant, Postpartum, and Breastfeeding Individuals  
List by Month and Criminality<sup>4</sup>  
FY 2022 - First Half**

<b>Month</b>	<b>Convicted Criminal</b>	<b>Pending Criminal Charges</b>	<b>Other Immigration Violator</b>	<b>Total</b>
October	1	-	46	47
November	-	-	84	84
December	-	-	48	48
January	-	1	36	37
February	-	-	19	19
March	1	-	36	37
<b>Total</b>	<b>2</b>	<b>1</b>	<b>269</b>	<b>272</b>

**ICE Initial Book-Ins on Pregnant, Postpartum, and Breastfeeding Individuals  
List by Release Reason  
FY 2022 - First Half**

<b>Release Reason</b>	<b>Total</b>
Bonded Out - Field Office	0
Bonded Out – Immigration Judge	0
Order of Recognizance	127
Order of Recognizance - Humanitarian	9
Order of Supervision	2
Order of Supervision - Humanitarian	1
Paroled	124
Paroled - Fear Found	0

<sup>4</sup> Starting in FY 2018, ICE defines immigration violators’ criminality in the following manner: Convicted Criminal: Immigration Violators with a criminal conviction entered into ICE systems of record at the time of the enforcement action. Pending Criminal Charges: Immigration Violators with pending criminal charges entered into ICE system of record at the time of the enforcement action. Other Immigration Violators: Immigration Violators without any known criminal convictions or pending charges entered into ICE system of record at the time of the enforcement action.

<b>Release Reason</b>	<b>Total</b>
Paroled - Humanitarian	7
Processing Disposition Changed Locally	0
Relief Granted by Immigration Judge	1
Removed	1
Title 42 Return	0
U.S. Marshals or other agency (explain in Detention Comments)	0
No Release Reason	0
<b>Total</b>	<b>272</b>

The following chart denotes the ALOS for both general and pregnant, postpartum, and breastfeeding populations in ICE facilities for the first half of FY 2022. The ALOS for pregnant individuals in ICE custody, on average, was 6.6 days, which is significantly lower than the ALOS for the general ICE-detained population (23.9 days).

**ALOS for the ICE General Population and  
Pregnant, Postpartum, and Breastfeeding Populations by Month  
FY 2022 - First Half**

<b>Month</b>	<b>Pregnant, Postpartum, and Breastfeeding Population ALOS</b>	<b>General Population ALOS</b>
October	2.7	23.5
November	4.4	23.7
December	4.0	24.9
January	10.8	25.4
February	10.5	22.6
March	7.0	23.3
<b>Overall</b>	<b>6.6</b>	<b>23.9</b>

## IV. Conclusion

ICE ERO oversees the civil immigration detention of one of the most highly fluid and diverse populations in the United States. ICE remains committed to prioritizing the health, safety, and welfare of people in its custody, including pregnant, postpartum, and lactating individuals. ICE continues to take all necessary measures to ensure that pregnant individuals in its custody are identified as soon as possible and that their needs are addressed following medical advice in all cases.
